Product List

Ball Bearings – Loose Steel Balls and Miniature Bearings suitable for model equipment all available in Metric and Imperial sizes.

Ball and Roller Bearings – Deep groove, Angular contact, Self aligning, Thrust type and Tapered Roller Bearings available in Metric and Imperial sizes.

Needle Roller Bearings – Shell and Cage type Needle Roller Bearings in Metric and Imperial sizes.

Cam Bearings – Cam Follower and Roller Follower Bearings, again Metric and Imperial sizes available.

Plain/Rod End Bearings – Spherical Plain and Rod end type Bearings in Metric and Imperial sizes.

Linear Slide Bearings – Linear Bearings and Rails available in various sizes and styles. E.g. Plain, Open and Adjustable. Sealed or unsealed.

Housed Bearings – Cast iron and Pressed steel bolted housings with Self Aligning Bearing Inserts with Metric and Imperial Bore sizes. Also Thermo Plastic Housing and Stainless Steel Bearing Inserts available for use in Food and Water based applications.

Plummer Block Bearing Units – Blocks, Bearings, Adaptor Sleeves, Locknuts and Washers, Locating Rings and Seals. All Individually available to suit various sizes and needs.

Oil Seals – Single and Double spring lipped rotary shaft seals in Metric and Imperial sizes.

Dowty Seals – Including self-centring available in a range of sizes.

Hydraulic and Pneumatic Seals – All types of Wiper, Single/Double Acting and Vee Pack Seals.

Mechanical Seals – Water Pump Seals etc.

'O' Rings – Vast Range of Metric and Imperial round section O.Rings in all Materials.

Circlips and Snap Rings – Mild steel and Stainless steel Material. Go by the shaft or bore size, Not the Groove size.

Oilite Bushes – Self lubricating oilite material in Metric and Imperial sizes, Plain or with a Flange.

Glacier Bushes – Pressed steel split bushes in Metric and Imperial sizes with or without a Flange.

Pulleys – All types of pulleys to suit various belts. Vee, Poly Vee, Flat roller, Jockey and various toothed pitch Timing pulleys all available with either Taper Bush centre or individually machined to suit your needs.

Belts – Vee, Poly Vee, Flat, Toothed, Variable Speed Belts and Conveyor Belts. Some belts can be supplied with different backings to suit individual jobs.

Sprockets – Different pitch toothed sprockets to suit Simplex, Duplex and Triplex Chains. Taper bush centres can be fitted for a quicker application or sprockets can be machined to suit individual needs.

Chain – Roller chain to suit everything from Printing Machines to Agricultural machinery. British and American Standards. Conveyor and Wire Mesh Chains, also Leaf chain to suit Forklift trucks etc.

Belt and Chain Tensioners and Idler Wheels.

Taper Bushes – Easy fit Taper Bushes in Metric and Imperial bore sizes complete with Key way.

Drive couplings – Flexible drive, Nylon gear, Chain couplings and Rubber Tyre couplings. All available in different diameters and bore sizes.

Oil – Variety of Hydraulic and Gear Oil available

Grease – Bearing, Food and Waterproof, Grease available in cartridges or tubs.

Sprays – Variety of Cleaning, Lubricating and Surface protection sprays available.

Adhesives – All types of engineering Adhesives

Universal Joints – Single and Double knuckle Joints available in different diameters, Blank ends or Bored to fit your needs. Hardi-spicer joints and much more available.

Electric Motors and Gearboxes – Single and Three Phase Motors, Geared Motor units and various Gearboxes.

Miscellaneous Items – Silver steel, Key steel, Shim steel, Wheels & Castors, Shaft locking Collars Disc springs, Compression and Expansion Springs.

Tools – Circlip Pliers, Bearing Fitting kits, Bearing Pullers & Separators.
